## INSTRUCTIONS:

Trim out the pieces with scissors. Don't forget to cut the color-coded assembly slots in each piece. Mountain-fold the base piece on the dashed lines and secure into a tapered loop by sliding the two vertical WHITE slots into each other (loose ends stay INSIDE the loop). Insert the foreground and background pieces into the white divider piece by sliding the corresponding ORANGE and BLUE slots the BLUE slots into each other. Then insert your completed character UNIT into the base piece! The final step is to slide the arm piece into position using the GREEN and PINK slots.
